

Manufacturing Services

Product Design

At the centre of ALAR's design and engineering department is the latest Radan CAD/CAM system.

CNC Punching

ALAR Engineering has invested heavily in the very latest fully automated high speed punching cell. This system is only one of a few fully automated systems in the UK.

CNC Laser Cutting

NEW FOR 2015 AMADA LCG 3015 CO2 Laser Cutter with an Automated Material Handling System represents a £500K investment in line with Alar Engineering's policy of continuous improvement.

CNC Forming

ALAR Engineering has the very latest state of the art high speed Amada press brakes.

Powder Coating

Substantial investment in powder coating technology enables ALAR to offer the complete powder coating service. A wide range of finishes are available for all base metals.
